📁 <https://www.behance.net/vasilspirov>

Senior UX/UI Designer with 10+ years delivering end-to-end product experiences across fintech, payments, and Web3 enterprise platforms. Fluent in Figma, design systems, and accessibility standards (W3Cx certified). Comfortable bridging design and front-end - HTML/CSS/React - with a track record of collaborating directly with engineering teams from discovery through to deployment.

Experience

Limechain / Product Designer

JUN 2023 – PRESENT

Designed enterprise platforms across fintech, payments, and Web3 for clients like Coinbase, Binance, Hedera, and the Solana Foundation. Owned features end-to-end from early discovery through to final delivery, covering everything from User flows and Wireframes to polished UI and interactive Prototypes.

Took full responsibility for the Design process on each engagement, starting with understanding what the client actually needed and seeing it through all the way to deployment.

Applied and maintained a consistent design system across multiple client products. Ran design QA during development, iterating on solutions based on engineering feedback and usability findings. Ensured all designs met WCAG accessibility standards; conducted design QA during development handoff.

Led end-to-end UX research on a Web3 education platform (OpusEdu): designed and ran generative user interviews across creator and learner segments, built a quantitative usability study, and synthesised findings into actionable product recommendations.

Karizma / UX/UI Designer

JAN 2022 – JUN 2023

Took complicated, multi-step workflows and reworked them into experiences that actually make sense to the people using them, across several digital products.

Spent time mapping how users moved through those journeys, then restructured the Information architecture to cut unnecessary steps and make navigation feel effortless. Brought everything together through User flows, Prototypes, and Documentation that kept product, engineering, and stakeholders on the same page.

Studio Zlaten Vek / Multimedia Designer

2014 – 2021

Designed interaction sounds and UI notifications for mobile products reaching global markets, alongside visual and interactive content for TV, web, and radio. Worked cross-functionally with designers, copywriters, and clients to keep experiences clear, consistent, and on-brand.

Eightcap / Design Consultant

2014 – CONTRACT

Contributed to both the design and development of the client onboarding flow, helping shape an experience that made it easier for new users to get started.

Skills & Tools

Research

Generative Interviews · Usability Testing
Concept Testing · Survey Design
Analytics-driven Discovery

Design

Product Strategy · Prototyping
Interaction Design · Visual Design
Design Systems · Accessibility (W3Cx certified)

Technical

HTML/CSS · Basic JavaScript/React
· Git – able to review, prototype in, and QA production code alongside engineers

Tools

Figma · Figma Make · Adobe CC ·
NotebookLM · Lovable · Claude Code/Design
v0.dev · Webflow

Academic Achievements

Web Accessibility / W3Cx

UX Design Specialization / Google

UX/UI Upskill / Telerik Academy

Cursor Masterclass / Memorisely

Claude Code in Action / Anthropic Academy

Education

NBU / BA SD

2010 – 2014
